

What are you doing about falls?

WHY DOES EARLY EVALUATION MATTER?

Getting an early evaluation at a regular screening can prevent a worrisome fall. With VSTBalance, we can predict the likelihood of a future fall and work to prevent it.

WHAT IS VSTBALANCE?

VSTBalance is an automated mobility assessment tool that helps you to identify fall-risk before a fall. The system uses artificial intelligence and machine vision to identify deficits in balance, gait, and function — the three leading indicators of fall-risk.

BENEFITS OF A VSTBALANCE SCREENING

- Identify fall risk before a fall with simple, evidence based assessments.
- Receive a personalized plan of care that targets identified mobility issues.
- Track improvement at every step with the VSTWell app.

Stay informed about your mobility! Talk to your healthcare providers today about getting a regular VSTBalance screening.
